

SUGGESTED METHODS OF FLASHING

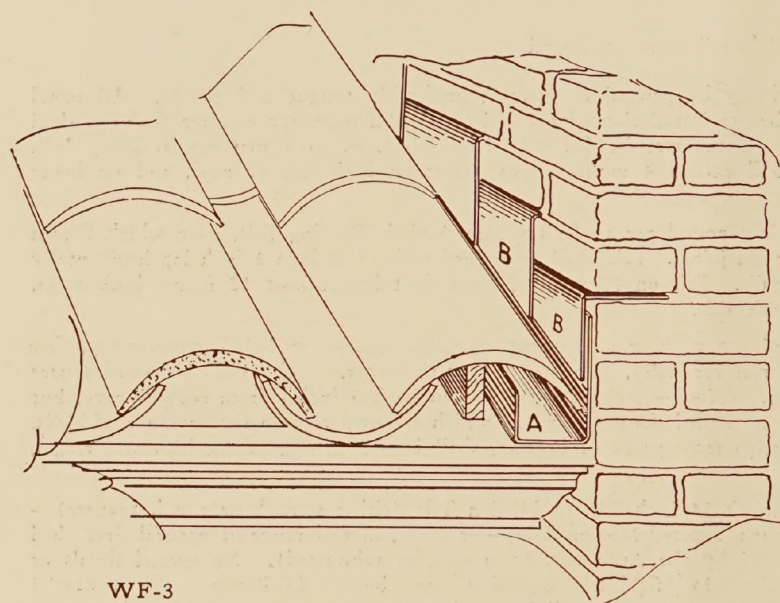

WF-1

WF-2

WF-1—Showing treatment of counter flashing where tile dies into wall.

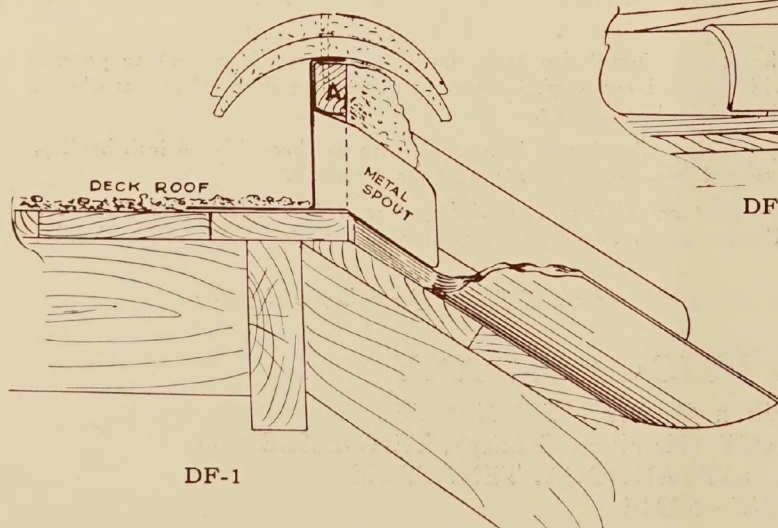

WF-2—Cross section showing metal flashing and cement chinking in pan tiles.

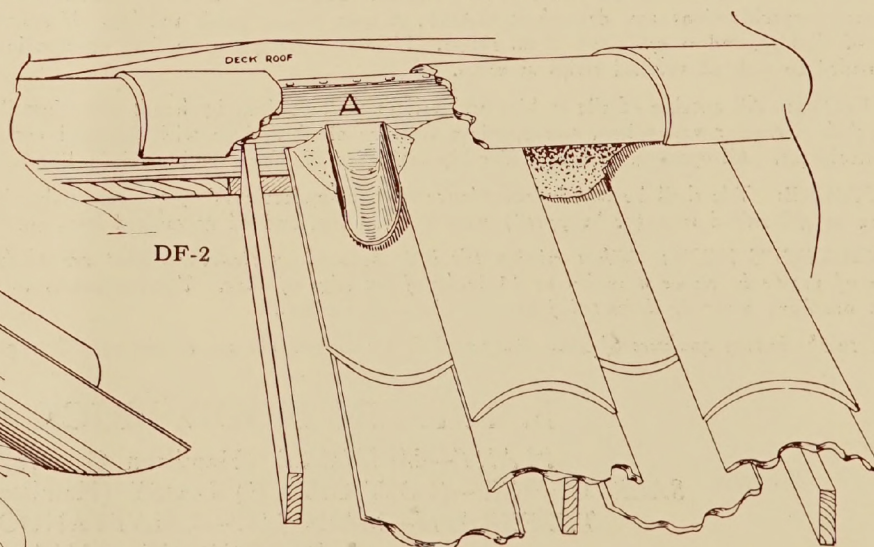

WF-3

WF-3—Shows method of flashing against brick wall. (A) Continuous trough extending up wall at the rake of the roof. (B) Stepped counter flashings inserted in joints and extending down into trough.

DF-1—Cross section, of intersection of roof and deck, showing method of releasing water by small spouts (A) into pan tile (DF-2). The number of the outlets should be controlled by the size of the deck.

DF-1

DF-2
